Approximately \$109,714,279 in CDBG funds for projects with mitigation components has been spent in or allocated to the State as of June 30, 2011. This list is only an estimate for two reasons: First, some of the award amounts listed include non-mitigation projects, but the amount spent on mitigation projects was inextricable so the entire amount is listed; Second, some projects were omitted from the list because the mitigation component was relatively small.

Table D.7 lists the CDBG-PF funds only through 2004 because relevant PF project awards are added into the EAP award amounts for all subsequent years.

LiDAR stands for Light Detection and Ranging and is used to create accurate floodplain and other topographical maps.
